-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Objections

Claim 4 is objected to because of a typographical error: "denot" is incorrect and should be changed to --denote--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 2, 4 and 5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. Specifically, Applicant's have not defined terms a, b, and c in either the specification or the claims. In the absence of a working definition for these terms, Applicant's appear to only have support for the working examples of the specification (Examples 1-3). However, these working examples fail to provide any conclusive data as to the numerical values of a, b, and c; determination of these values require that the commercially available starting materials KF-86, X-22-3939A, and KF-393 are defined in terms of the numerical values of a, b, and/or c. This information is required for Applicant's to have full support of the working examples.

Response to Arguments

Applicant's arguments, see pages 16-18, filed on August 23, 2007, with respect to claim 2 have been fully considered and are persuasive. The examiner agrees that the presence of the

amino spacer does render the compounds of instant claims 2, 4, and 5 novel and unobvious. The prior art rejections have been withdrawn. However, claims 2, 4, and 5 are rejected under the new grounds of rejection cited above.

Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Loewe whose telephone number is (571) 270-3298. The examiner can normally be reached on Monday through Friday from 9:30 AM to 7:00 PM EST.
